

AMSENS

Shanghai

TEXTILE

China

Headquartered in Shanghai, China, Amsens Textile is specialised in designing, manufacturing and distributing all kinds of sustainable fabrics for garments with a dual emphasis on creativity and high quality.

We focus on every steps of fabric business and the fabric quality and the delivery time are top two priorities in our business. We have our own internal supply chain management system which helps our clients and us doing business more efficiently and safely.

Hemp fabric

Hemp is a lightweight fabric, which means that it is highly breathable, and it also effectively facilitates the passage of moisture from the skin to the atmosphere, so it is ideal for hot climates. It is easy to dye this type of fabric, and it is highly resistant to mold, mildew, and potentially harmful microbes.

Hemp fabric softens with each washing, and its fibers don't degrade even after dozens of washings. Since it's also relatively easy to produce organic hemp fabric sustainably, this textile is practically ideal for clothing.

Recommendation —Hemp/Organic Cotton Canvas

Article No.	Content	Specification	width	Weight
HCL11241	55%Hem/45%OC	11S/2x7Sx41x30	53/4"	270gsm

We have greige fabric in stock for this article, always prepare to make samples and bulk production, so we can deliver the fabric to our clients in short time.

Picture

How do we work together?

Amsens Textile provides the custom ethical fabric in small quantity with good quality and fast service, which is very important since the ethical fabric usually is very expensive and small batch delivery can save a lot of cost for our clients.

1

Analyzing the request.

We usually collect the below information to analyze the request of our clients:

- a, Specific usage of the fabric.
- b, The fiber content.
- c, The weight and the width.
- d, Is the fabric dyed or printed?

2

Making proposal for approval.

We offer our proposal based on the client's request and our resources in hand to make sure that the request can be met.

3

Making samples for approval.

Usually we make a few meters sample for approval. The sample making takes around 1-2 weeks. The sample will be delivered via the international express company.

4

Making bulk production.

The bulk production will be started once the sample is approved. It will take around 3-4 weeks.

5

Making bulk production.

It depends on the client's request; we can send the fabric by sea or by air.

6

After-sales service.

We can offer professional techniques of the fabric when our clients make garment to make sure that the fabric is processed well.
